SUMMARY

Senior Mobile Application Developer with 9 years of experience delivering Flutter, Android, and iOS applications across Travel, Social Media, Real Estate, and E-Commerce domains. Owns the full mobile app lifecycle end-to-end, including release engineering and App Store / Google Play publishing. Skilled in Flutter, Dart, Kotlin, Swift, Java, REST APIs, Firebase, unit and widget testing, Git-based CI/CD workflows, WebRTC, Agile delivery, and mobile architecture patterns (MVC, MVVM, MVP). Early adopter of AI-assisted software development (ChatGPT, Claude, GitHub Copilot, Antigravity) to accelerate delivery and improve code quality. Proven track record leading teams, driving architectural decisions, and mentoring engineers to deliver scalable, enterprise-grade mobile solutions.

PROFESSIONAL EXPERIENCE

Sr. Mobile Applications

April 2020 – Present

AirRetailer & Voizzit Technologies Dubai

- Led 4 members in cross-platform mobile application development for iOS and Android using Flutter, Dart, Kotlin, and Swift.
- Drive software architecture decisions and enforce coding standards to improve maintainability and scalability.
- Own end-to-end release management, including build signing, versioning, and App Store / Google Play submissions.
- Manage Agile sprints, stakeholder communication, delivery planning, and team coordination.
- Mentor junior and mid-level developers through code reviews, technical guidance, and unit/widget testing practices to raise release quality.
- Integrated Stripe payments, IATA/NDC standards, and GPS/location services.
- Leveraged AI tools, including ChatGPT, Claude, Antigravity, and GitHub Copilot, to accelerate development, improve code quality, generate documentation, and troubleshoot complex technical issues.

Mobile Application Developer

October 2019 – March 2020

DistrictR, Dubai

- Built scalable applications using Flutter, Java, Swift, and Kotlin.
- Implemented payment gateways, push notifications, and social login integrations.
- Maintained code quality and participated in sprint planning.

Mobile Application Developer

October 2016 – September 2019

Norjimm & PieDistrict, Kozhikkode, Kerala

- Built scalable mobile solutions using Flutter, Java, Swift, and Kotlin.
- Integrated push notifications, social media logins, and payment modules.
- Maintained code quality and participated in sprint planning.

PROFESSIONAL SKILLS

Languages/Frameworks: Flutter | Dart | Android | iOS | Kotlin | Swift | Java

Databases: SharedPreferences | SQLite | Firebase | Realm DB

Version Control & Workflow: Git | GitLab | GitHub | Git-based CI/CD pipelines

Testing & Quality: Unit testing | Widget/UI testing (Flutter Test) | Code review practices

Release Engineering: App Store & Google Play publishing | App signing & provisioning | Release/version management

VoIP: Agora | WebRTC | WebSockets

State Management: Provider | Redux | Riverpod | BLoC | GetX

Architectural Principles: MVC | MVVM | MVP

Payment Gateways: Stripe | RazorPay | IFG

Others: IATA | NDC | REST APIs | Push Notifications | Location Services | AI-Assisted Development | Prompt Engineering

KEY PROJECTS

- AirBooking – Corporate travel booking platform with IATA/NDC integration. ([Android](#) | [iOS](#))
- Voizzit – Social networking application with Agora/WebRTC communication. ([Android](#) | [iOS](#))
- IndiaFirst - OTT platform channel ([Android](#) | [iOS](#))
- V-Data - Kerala Voters list ([Android](#))
- DistrictR – Real-estate services application with Google Maps and FCM. ([Android](#) | [iOS](#))
- Yourdux – Room booking platform with Stripe payment integration.
- Middi – Online service request/provider application.
- TFB – Food delivery application for online food ordering and delivery.
- Whosup – Social dating application with integrated payment and location services.

EDUCATION

- BCA – IIKM Business School, Kozhikode (2010–2013)
- DCA (Certification) – G-Tech, Perambra (2010)
